DEFINITIONS

Page 7
Total Fund Membership
Total Fund Membership is the number of member records held on the LPPA pensions administration system that are contributing to, awaiting, or receiving benefits from the pension fund.

Page 9
Casework Performance - All Cases

Performance is measured once all information is made available to LPPA to enable them to complete the process.

Relevant processes are assigned a target timescale for completion, and the performance is measured as the percentage of processes that have been completed within that timescale.

Page 10
Casework Performance - Standard

The category of 'Other' on this page covers processes including, but not limited to:
APC/AVC Queries
Additional Conts Cessation
Change of Hours
Change of Personal Details
Under Three Month Opt-Out

Please note that this page includes cases that have met the SLA target, but the stop trigger may also have been actioned before the process has been completed.

Page 11
Ongoing Casework at the end of the Reporting Quarter

Please note the number of processes brought forward, does not match the corresponding number of outstanding processes reported in the previous quarter (due to various reasons which can include but are not limited to, the deletion of a process, or changes to the process category that a case is assigned to).

Page 17
Contact Centre Performance
Average wait time measures the time taken from the caller being placed into the queue, to them speaking with a Contact Centre adviser.

Page 20
Contact Centre Call Satisfaction
Members are given the option to answer two questions, following a call with the LPPA Contact Centre (these relate to general satisfaction with LPPA, and satisfaction with the adviser they have spoken to – both responses follow a three-point rating scale).

Page 22
Retirement Satisfaction
Graphs show a breakdown of quarterly retirement surveys (emails issued and responses received).

- Retirements processed / completed - members can have multiple process counts.
- Surveys issued - does not equal retirement processes for several reasons; ill health retirements do not receive a survey; not all members provide an email address; members with multiple retirement processes only receive one survey email; there is a planned delay in issuing surveys to allow for initial payments to be paid).

Satisfaction / Dissatisfaction is included as a % of email surveys issued. This demonstrates that a significant number of surveys are not completed (work is ongoing to encourage an increase in the number of responses to email surveys issued).
The Satisfaction Scores highlighted in green and red compare the satisfied / dissatisfied responses received, as a % of total survey responses - this is the true measure of member satisfaction.
Satisfied responses include satisfied (with the service) and very satisfied.
Dissatisfied responses include dissatisfied and very dissatisfied.

Page 25
Member Online Portal
The number of member records by status, that are registered for LPPA's member self-service portal, PensionPoint.

Page 26
Member Log Ins
The number of unique log ins and total log ins by period on PensionPoint, these are only successful log ins where the password and one-time-pin has been successfully entered.

Page 32
Common/Scheme Specific Data Fails

The Pensions Regulator requires administrators to keep member data up to date to ensure benefits are accurately paid. This is split by Common Data (basic details that are specific to the Member) and Scheme Specific Data (data that is related to a member's data and specific circumstances surrounding their record).

Individual Fails shows the total number of unique members that have a single or multiple number of Common Data or Scheme Specific Data fails. On both charts, the Accuracy Rate (%) then compares the number of Individual Fails to the total number of Scheme Members.

For more detail on the Data Items / Error types presented in these charts, please visit either the TPR (The Pensions Regulator) or PASA (The Pension Administration Standards Association) websites.

EXECUTIVE SUMMARY

Forward thinking…
Working together…
Doing the right thing…
Committed to excellence…

This performance report covers the reporting period of Q1 2025/26 (April – June 2025)

Casework SLA performance

Overall operational casework performance was **98.9%** against overall Service Level Agreements (SLAs) for the quarter. Focus continues to be on driving further improvements to the member experience.

Contact Centre

Contact Centre wait times have been consistently under the targeted 4-minute wait time with an average wait time over the quarter of **3** minutes **44** seconds.

Satisfaction scores

The majority of those surveyed about their retirement experience do not respond. Of those that responded to the survey, customer satisfaction was **64.1%** for Actives into Retirement and **74.5%** for Deferred into payment. Low survey responses can lead to high volatility in the satisfaction scores.

Contact Centre satisfaction includes both overall satisfaction and satisfaction with the individual call handler that the member spoke to. Satisfaction with the individual call handler is typically higher than overall satisfaction, with satisfaction rates for the quarter at **94.8%** and **76.8%** respectively.

Statutory deadlines

Regulatory and statutory deadlines for the reporting period:

Pensions increases (PI) have been applied. All eligible member records that have not had PI applied are with the Member Services teams for investigation and resolution. Not all the exclusions will need PI calculating.

P60 notification communications to retired members were completed by the statutory deadline of end of May.

Outlook

Activity levels are, and are expected to remain high, due to:

- Preparation for LG valuation data submission
- Significant regulatory change including implementation of McCloud remedy and the Pensions Dashboard
- Preparation for Annual Benefit Statement production
- Efficiency and Service Improvement Programme (ESIP) of work
- Activity to continue to improve the member experience in key areas.

LPPA PROJECTS - UPDATE

Forward thinking…
Working together…
Doing the right thing…
Committed to excellence…

McCloud Remedy

Following the McCloud judgment, changes to all public service pension schemes that provided transitional protections to older members, including the LGPS came into force on 1 October 2023. The changes were designed to rectify unlawful discrimination against younger scheme members.

In the LGPS, the impact is an extension of the underpin to all eligible members. The national timeline for revisiting all member cases is Oct 23 – Aug 25.

A dedicated project manager and team remains in place overseeing and delivering all the key areas of the project including:

- System design and development is thoroughly tested prior to release into the live environment.
- Appropriate communication plans are in place and delivered.
- Contact Centre and Operational colleague training and business readiness.

Current Position

- Analysis of the McCloud cohorts and associated actions has been completed.
- Across all LPPA LG clients, c.15% are eligible for McCloud, based on the data we hold
- Production of the 2025 Annual Benefit Statements (ABS) for Active and Deferred members has commenced with initial focus on those not eligible for McCloud and therefore not requiring underpin information included in their statements.
- Testing continues on the UPM functionality for ABS with McCloud underpin information, ahead of 31st August 2025 deadline
- Preparatory work and testing underway for retrospective cases.

Efficiency and Service Improvement Programme

LPPA's Service Improvement Programme (ESIP) is designed to leverage the investment in UPM, delivering automation and improved self-service capability and member experience.

Online retirement forms (for members to access through PensionPoint) have been rolled out for all Funds. Early analysis of usage to date shows significant improvements in response rates and timescales for completed online forms over paper forms.

Automated Deferred Retirement Payment process is live. This enables a fully automated end to end deferred retirement process, following previous automation of deferred retirement quotes and the online retirement form. This is the fifth ESIP automation and will be followed by automation for the payment process for CARE only active retirements.

Bank validation account name check is live as a proof of concept for 4 initial LG processes, with planning underway for further processes.

Other activity in flight includes work to improve the monthly returns process and the member and employer online portals.

Data Project

LPPA is partnering with Civica and Intellica to improve data quality ahead of valuation and the introduction of the Pensions Dashboard.

Data Validation Fails (DVF's) continue to be worked through.

The procurement route is being confirmed for a targeted data tracing exercise, which will enable cleansing work that needs to be completed before Pension Dashboard becomes available to members (likely late 2027)

The project continues to work towards producing a series of dashboards to give us clear visibility of the integrity and accuracy of the data that we hold to comply with regulatory change and to enable us to launch more self-service and automation for members and employers.

Pensions Dashboard

The Pensions Dashboard will enable individuals to access their pensions information online, securely and all in one place. The connection date for public sector schemes to connect to the Pensions Dashboard is 31 October 2025. The project continues to track green, and work is well underway, including:

- Systems requirements (including the rules for partial matching of records and the treatment of AVCs)
- Business readiness (e.g. readiness to deal with new inbound enquiries relating to dashboard)
- Regular LPPA round table meetings being held with Funds to share updates.

ONGOING CASEWORK AT THE END OF THE REPORTING QUARTER

The following table is created by identifying all reportable casework within UPM, and includes those that have subsequently Completed / Aborted / Remain Outstanding within the quarter. The figures in this table cannot be compared to those in the previous slide for a number of reasons including: the table includes aborted cases, but the horizontal bar graph does not; the SLA 'stop trigger' can be actioned before the process has been completed.

	Brought forward at 01/04/25	Received (Inbound)	Completed (Outbound)	Work in Flight as of 30/06/25
New Starters	23	181	192	12

- On-time notification - first payment
- Late notification - first payment

ACTIVE TO RETIREMENT

EMPLOYER RETIREMENT NOTIFICATIONS

CLIENT SPECIFIC

Please note:
LPPA require at least 30 days notice prior to an active member retirement date, to be able to pay a member their first payment within 30 days of their retirement date. The chart below shows the number / % of on-time notifications vs. the number / % of late notifications from employers in the month (late being received within 30 days or after the retirement date).

	Jul 24	Aug 24	Sep 24	Oct 24	Nov 24	Dec 24	Jan 25	Feb 25	Mar 25	Apr 25	May 25	Jun 25
Retirement Notifications	30	31	25	31	39	31	33	20	25	32	26	31

Received Late (Number)	15	19	19	19	27	22	21	15	15	15	22	16
Received Late (%)	50.0 %	61.3 %	76.0 %	61.3 %	69.2 %	71.0 %	63.6 %	75.0 %	60.0 %	46.9 %	84.6 %	51.6 %

Data based on retirement notifications received from employers in the month.

ACTIVE TO RETIREMENT

ON-TIME NOTIFICATION - FIRST PAYMENTS

CLIENT SPECIFIC

Please note:
Alongside the timeliness of when LPPA are notified of a members intention to retire, there are also other areas impacting the timeliness of when payments are made. The accuracy of retirement information received (typically the calculation of pensionable and/or CARE pay) often result in subsequent queries being raised with an employer. There may also be delays with members returning their retirement forms.

	Jul 24	Aug 24	Sep 24	Oct 24	Nov 24	Dec 24	Jan 25	Feb 25	Mar 25	Apr 25	May 25	Jun 25
No. of payments made where member has an AVC	2	0	1	2	2	0	2	1	1	1	1	2
No. of payments made with **no** AVC	13	12	5	10	10	9	10	4	9	16	3	13
% of payments made within 30 days – with AVC	0.0 %	N/A	0.0 %	0.0 %	0.0 %	N/A	100.0 %	0.0 %	0.0 %	0.0 %	0.0 %	0.0 %
% of payments made within 30 days – **no** AVC	53.8 %	66.7 %	40.0 %	40.0 %	60.0 %	88.9 %	70.0 %	75.0 %	55.6 %	81.3 %	100.0 %	61.5 %
% of payments made within 30 days – combined	46.7 %	66.7 %	33.3 %	33.3 %	50.0 %	88.9 %	75.0 %	60.0 %	50.0 %	76.5 %	75.0 %	53.3 %

Data based on processes completed in the month.
Measurement is based on the earliest payment made, i.e. earliest of first pension payment or lump sum.

ACTIVE TO RETIREMENT

LATE NOTIFICATION - FIRST PAYMENTS

CLIENT SPECIFIC

Please note:
% of first payments made within 30 days of retirement date – where LPPA receives the leaver notification from the employer with less than 30 days notice, or after the actual retirement date.

	Jul 24	Aug 24	Sep 24	Oct 24	Nov 24	Dec 24	Jan 25	Feb 25	Mar 25	Apr 25	May 25	Jun 25

EMPLOYER ENGAGEMENT & COMMUNICATION ACTIVITY

ALL
LPPA

Delivered

- LPPA won the award for Best Pension Scheme Communications Strategy at the 2025 Professional Pensions UK Pensions Awards. The award was presented for a series of campaigns delivered over the past 12 months, which helped to drive membership to the online PensionPoint portal.
- LPPA were also shortlisted for Third-Party Administrator of the Year at the same awards event.
- Member training sessions were delivered, including Making Sense of Your (LGPS) Pension (to support new joiners in understanding their LGPS pension), and Making Sense of Your Retirement (to prepare members in their plans for retirement).
- Training sessions were successfully delivered to support employers including:
  - Monthly Returns (successfully submitting files and resolving data queries)
  - LGPS Scheme Essentials (including support with calculating final pay, CARE pay and assumed pensionable pay)
  - Employer Responsibilities (support with ongoing pension administration responsibilities)
  - Absence and Ill Health (support with managing different types of absence in the LGPS)
- The annual, online retired member newsletter was published on the LPPA website, and emails issued to members. The newsletter helped to support members looking to access their 2024/25 P60 documents, and included pension pay dates for 2025/26 and information on the McCloud remedy.
- Information on the McCloud Remedy was updated on the LPPA website for LGPS members.
- The LPPA website was updated in Q1 to include self-serve information on:
  a. The LPPA Employer Toolkit – this was enhanced to include useful information for scheme members / employees, that can be issued by employers (emails or internal communications). Information included AVC's, the retirement process, nominating beneficiaries and ABS, in addition to existing information on registering for PensionPoint.
  b. The LPPA website was also updated to include the latest details on APC limits.
- Pension Pulse (employer newsletter) was issued in Q1 with features on:
  a. Employer toolkit retirement pack – this includes emails, posters and intranet wording to help employers promote the LGPS to employees.
  b. New legislation introduced in April, which impacts on Assumed Pensionable Pay (APP), and is now applied when a member is on paid Neonatal Care Leave (NCL).
  c. Accessing the UPM employer portal – a reminder for employers without a site administrator on how to request access to the UPM employer portal.
- McCloud eligibility was re-run for LGPS members in June, which included member data validation and verification. This was a pre-requisite to the calculation of remedy underpin and the production of Annual Benefit Statements for Active and Deferred members in July and August, as well as retrospectively applying remedy for retired members and beneficiaries (where benefits are currently in payment).

Scheduled

- The annual (online) newsletter will be issued to active and deferred members, and will include updates on McCloud, ABS timescales, and how to access their document.
- ABS documents will be also issued in the post to members who request a paper copy, and if no email address is on their record.
- Further improvements will be made to the LPPA pensions website.
- Further Pension Pulse (employer newsletter) communications will be issued in Q2.

APPENDIX A
DATA QUALITY OVERVIEW

CLIENT SPECIFIC

Data Quality Overview

The purpose of this activity is to enhance data quality by embedding auditing tools into daily operations through Data Validation Checks (DVCs), by creating and maintaining a Data Improvement Plan which will be utilised internally to address root causes of data issues through process and system improvements. It also seeks to future-proof data processes by implementing controls to prevent data quality degradation and enable seamless automation and self-service opportunity without introducing new integrity concerns.

By checking member data against these checks on a regular basis, data integrity will improve over time leading to:

- Accurate and timely payment of pensions to the members
- Opportunity for automation and self-service functionality to work effectively, improving processing times
- Improvements to quality of the monthly data return collections and consequently TPR scores
- Improved member experience as delays relating to incorrect or missing data are significantly reduced

It is essential to recognise that improvements may not always follow a linear trajectory, particularly during periods where bulk processes are being run i.e. pensions increase.

Key Findings

Data improvement / Degradation from Baseline:

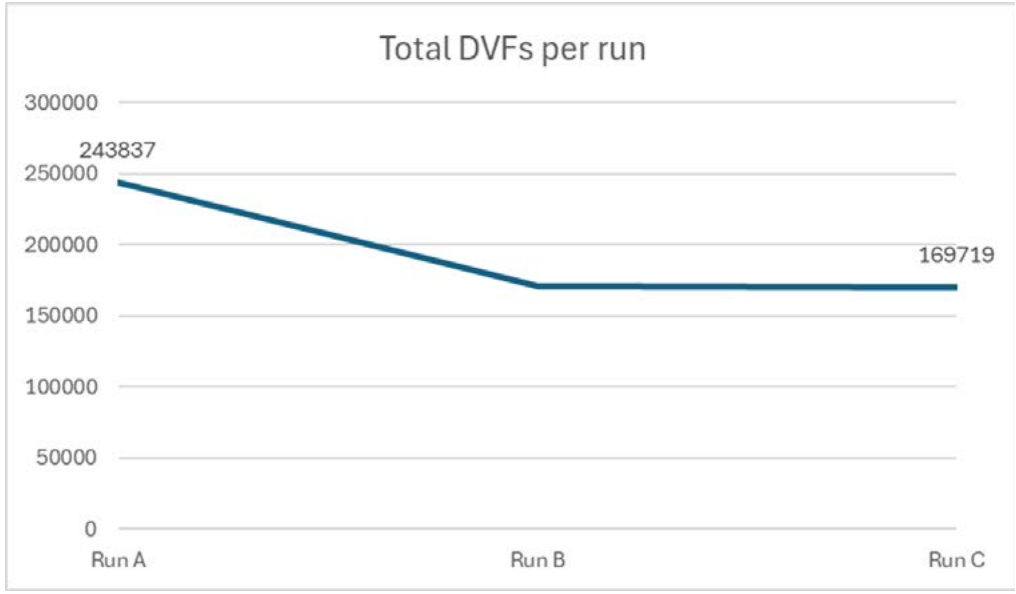
Not all Data Validation Failures (DVFs) are critical for the day-to-day processing of casework. DVFs do not equate to incorrect administration, as each member record is checked and where necessary, updated prior to processing. Many of the DVF's are critical for bulk routines to run smoothly i.e. pensions increase, annual benefit statements. Correcting these now will improve the success rate of each bulk routine and will enable more automation & self-service functionality to run 'straight-through' without the need to exception handle.

The overall total number of Data Validation Failures (DVFs) between 28 March 2025, Run A (Baseline – 243,837) and end of June 25, Run C (Current – 169,719) has improved, and the total number of failures has decreased by 30%.

A number of these fails are housekeeping activity which will be completed in bulk to enable future self-service and automated processes to run and not exception fail. This will enable our administrators to focus on more value-add activity such as supporting vulnerable customers or spending more time on query resolution activities.

We have a data improvement plan in place which we will continue to work through as business-as-usual activity. We have prioritised cleansing to date to be aligned to what your Fund actuary has deemed material for the triennial valuation. At this stage, we have not determined what good looks like in terms of data integrity. We will continue to work towards this and take a view in line with what we are seeing across all of the Funds that we work with. We will discuss this further with you at the appropriate time.

Fig. 1



APPENDIX A
DATA QUALITY OVERVIEW

CLIENT SPECIFIC

For this reporting period, we are providing more information on the integrity of data held in preparation for the Pensions Dashboard matching criteria.

LPPA will be adopting a Full Match Policy based on three core data elements including Surname, Date of Birth (DOB) and National Insurance Number (NINO). This is in line with the industry standard as recommended by the Pensions Administration Standards Association (PASA).

There are a few scenarios where a member may not get a full match on all three of the core data elements they provide. For example, the NINO and DOB match, but the surname does not. In these circumstances, we should return a 'possible match' to the member, and details of this can be seen below.

Type of M Type of Match	Data Items	Outcomes
Full	Surname + DOB + NINO	PEI created
Possible	NINO + Surname	Start possible match process
Possible	NINO + DOB	Start possible match process
Possible	Forename + Surname + DOB + Current Post Code	Start possible match process

During Q1, the number of Full Match (Surname, NINO, DOB) DVFs for your fund has increased by 1% (Fig. 2) and Possible Match (Forename, Postcode) DVFs has decreased by 2% (Fig. 3). Over 96% of members are 'Pensions Dashboard Ready' (data complete and in the right format) based on the matching criteria held on our administration system.

Fig. 2

Fig. 3

We are actively conducting further data cleanse on the data integrity to ensure readiness for the Pensions Dashboard, and these efforts will be sustained into the upcoming quarters. In addition, we are currently in discussions with third party providers to finalise the recommended approach for validating forename, surname and addresses. We will communicate the recommended approach with you in the coming months and confirm the pass through cost for carrying out this activity. In terms of the timeline for completing this activity, we need to have concluded it before the dashboard is available to members i.e. anticipated to be late 2026, and we intend to conduct these checks in line with triennial valuation (every three years) thereafter. A more detailed breakdown of readiness can be found below:
